**DETAILED ACTION*****Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
  - Group I, claims 1-30, 34-44 and 49, drawn to a leg compacting system for anastomosing device.
  - Group II, claims 31-33, drawn to anastomosis connector delivery system.
  - Group III, claims 45 and 48, drawn to an anastomosis connector.
  - Group IV, claims 46 and 47, drawn to an anastomosis connector.
  - Group V, claim(s) 50 and 51-53, drawn to a method of mounting a graft on a connector delivery system capsule.
  - Group VI, claim(s) 54-57, drawn to a method of graft attachment.
4. The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

| Group | Inventive Concept  |
|-------|--|
| I     | Leg confiners for a plurality of legs  |
| II    | A handle attachable at a plurality of different orientations                     |
| III   | Legs for anastomotic connector in which some legs bend outwards more than others |
| IV    | Legs for anastomotic connector in which some legs are stiffer than others        |

|    |   |
|----|---|
| V  | An axially split capsule  |
| VI | Releasing a plurality of legs to stretch open a vessel aperture |

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

6. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

7. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
